Era Planner

Test Report

by Sawit Koseeyaumporn

All Test cases

1. Page Load and Rendering

Test Case 1:

• Description: Successfully loads and displays accurate information on the home page.

Test Case 2:

• **Description:** Successfully loads and displays the current calendar on the calendar page.

Test Case 3:

• **Description:** Loads and displays the daily journal page, presenting a form for writing entries.

2. User Interaction

Test Case 4:

• Description: Clicking on a To-Do List item opens the edit page for that item.

Test Case 5:

• **Description:** Adding a new activity in the calendar works correctly.

Test Case 6:

• Description: The To-Do search function within the application operates as expected.

3. Responsive Design

Test Case 7:

• Description: The home page displays correctly on mobile screen sizes.

Test Case 8:

• Description: The calendar page adapts appropriately to tablet screen sizes.

Test Case 9:

• Description: The daily journal page shows suitable rendering on large screens.

4. Specific Functional Testing

Test Case 10:

• **Description:** Successfully saves data in the daily journal form, and retrieval of that data works as intended.

Test Case 11:

• Description: Creation and deletion of items in the To-Do List function as expected.

Test Case 12:

• **Description:** Theme changes and user-specific settings are applied and saved correctly.

5. App Functionality

Test Case 13:

• Description: The functionality of notifications or reminders is tested and verified.

Unit Testing

Using Jest.js for unit testing and test cases cover "Page Load and Rendering" test cases by creating test cases in the "__tests__" folder in the project directory.

Running unit testing by typing "npm test" in terminal and in the project directory

```
> personal-manager@0.1.0 test
> jest
       __tests__/Home.test.js (16.902 s)
 PASS
       __tests__/Todo.test.js (<mark>19.249 s</mark>)
 PASS
       __tests__/Calendar.test.js (19.35 s)
 PASS
         tests /Journal.test.js (19.382 s)
 PASS
Test Suites: 4 passed, 4 total
             4 passed, 4 total
Tests:
Snapshots:
             0 total
Time:
             32.177 s
Ran all test suites.
```

The picture shows the unit testing with Jest.js in project directory

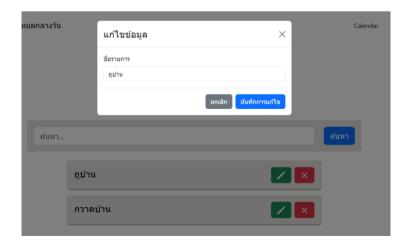

Manual Testing

Manual Testing for 'User Interaction', "Responsive Design", "Specific Functional Testing" and "App Functionality" test cases by trying click and navigating through the deploy web application on Vercel.

User Interaction Test Cases

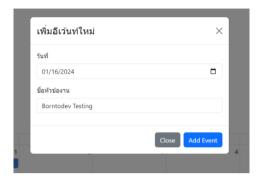

Test Case 4:

• Description: Clicking on a To-Do List item opens the edit page for that item.

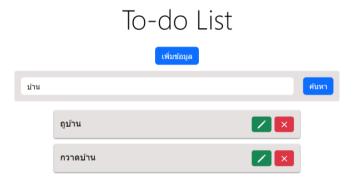

Test Case 5:

• Description: Adding a new activity in the calendar works correctly.

Test Case 6:

• Description: The To-Do search function within the application operates as expected.

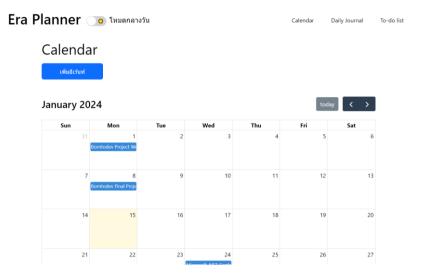

Test Case 7:

• Description: The home page displays correctly on mobile screen sizes.

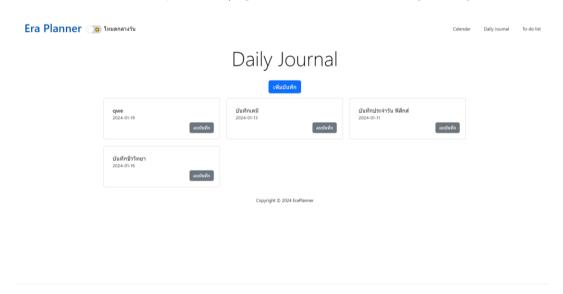

Test Case 8:

• Description: The calendar page adapts appropriately to tablet screen sizes.

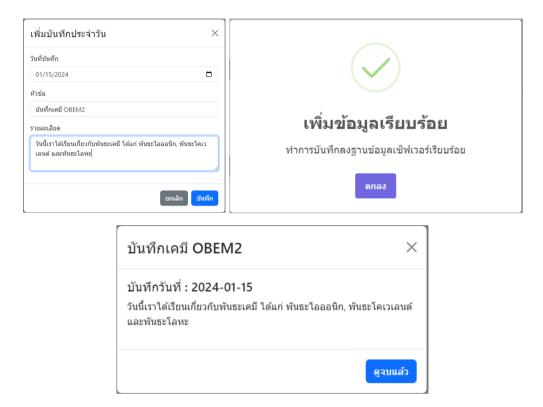

Test Case 9:

• Description: The daily journal page shows suitable rendering on large screens.

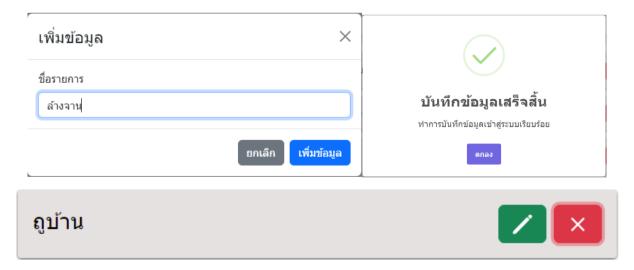

Test Case 10:

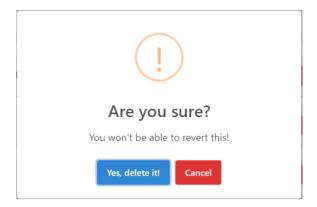

• **Description:** Successfully saves data in the daily journal form, and retrieval of that data works as intended.

Test Case 11:

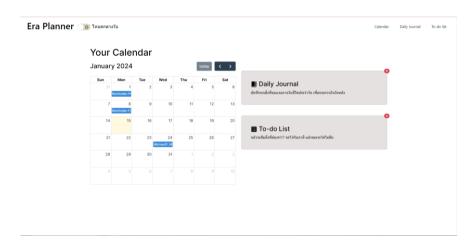

• Description: Creation and deletion of items in the To-Do List function as expected.

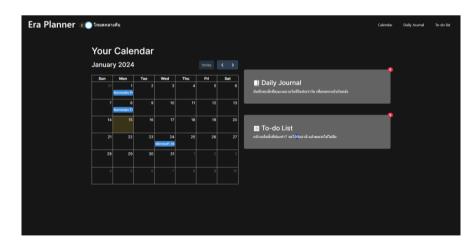

Test Case 12:

• **Description:** Theme changes and user-specific settings are applied and saved correctly.
